Kathmandu, Nepal

Summary

Junior AI engineer with nearly a year of professional experience building LLM-powered applications and asynchronous Python backends with FastAPI. Works across the retrieval stack: document chunking and embeddings, vector search with pgvector and Weaviate, and web data ingestion. Instruments LLM usage with Redis-based token tracking. Looking for a backend or AI engineering role where I can ship reliable RAG and API systems.

Experience

AI Engineer, Dignep Group Pvt. Ltd. Jun 2025 – Jan 2026

- Developed an LLM-powered travel assistant chatbot.
- Built asynchronous FastAPI services to run AI application workloads.
- Implemented Redis-based real-time token tracking to monitor LLM usage.
- Integrated Weaviate as the vector database behind retrieval workflows.
- Built ingestion pipelines with Crawl4AI and Selenium for dynamically rendered websites.

AI Engineer Intern, Dignep Group Pvt. Ltd. Mar 2025 – Jun 2025

- Worked on Retrieval-Augmented Generation (RAG) systems.
- Developed FastAPI backend services for AI applications.
- Worked with vector databases as part of retrieval pipelines.

Projects

Context Aware Assistant *Python, FastAPI, PostgreSQL, pgvector*

- Document question-answering system: vector search over embedded document chunks, with an LLM generating answers in real time.
- Tuned document chunking and embedding workflows.

Deep Web Scraper and Structured Markdown Generator *Python, Crawl4AI, Selenium*

- Deep-crawling pipeline for dynamically rendered sites.
- Converts scraped HTML to structured Markdown for downstream AI and RAG ingestion, preserving the site's directory structure.

Token Logging System *Python, FastAPI, Redis*

- Real-time LLM token tracking with asynchronous FastAPI processing.

Skills

Languages	Python, SQL
Backend	FastAPI, REST APIs, asynchronous Python, JWT and Argon2 authentication, Celery
AI and LLM	RAG, vector search, embeddings (Sentence Transformers), LangChain, LLM APIs (OpenAI, Ollama)
Data and storage	PostgreSQL, pgvector, Redis, Weaviate, Qdrant
Data ingestion	Crawl4AI, Selenium, BeautifulSoup
Tools	Git, Docker

Education

Bachelor of Computer Applications, Madan Bhandari Memorial College, Kathmandu 2022 – 2027 (expected)

Certifications

Intro to Machine Learning
Kaggle, May 2025

Supervised Machine Learning: Regression and Classification
DeepLearning.AI, Mar 2025

Introduction to Generative AI
Google Cloud, Jan 2024
